1980 Journal of Hydronautics Index

Note: Beginning this year, each of the journals published by AIAA will contain its own Index in the final issue of the year. In addition, a Combined Index, referencing all of the papers published during 1980 in the six AIAA journals and the *Progress in Astronautics and Aeronautics* books, will be offered for sale early in 1981 as the start of a new service that not only will combine the several indexes but also will cumulate them from year to year.

How to Use the Index

In the Subject Index, pages 127-128, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 128, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, page 128, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1980, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Ground Effect Machines

Historical Review of WIG Vehicles H80-010
Flow Control of Centrifugal Jet-Flap Blowers for Air-Cushion Vehicles H80-007

Energy

Rotating Machinery

Flow Control of Centrifugal Jet-Flap Blowers for Air-Cushion Vehicles H80-007

Fluid Dynamics

Boundary-Layer Stability and Transition

Boundary-Layer Transition on a Body of Revolution H80-019
Inviscid Parallel Flow Stability with Mean Profile Distortion H80-013
Predicting the Effects of Surface Roughness on Laminar-Turbulent Transition for Axisymmetric Bodies H80-012

Computational Methods

Boundary-Layer Transition on a Body of Revolution H80-019
Hydrodynamic Coefficients of an Oscillating Ellipsoid Moving in the Free Surface H80-017
Predicting the Effects of Surface Roughness on Laminar-Turbulent Transition for Axisymmetric Bodies H80-012
Multiple Body Six Degrees of Freedom Potential Flow Pressure Equation H80-004

Hydrodynamics

Spread of Oil Slicks on a Natural Body of Water H80-021
Boundary-Layer Transition on a Body of Revolution H80-019
Potential Hydroelastic Instability of Profiled Underwater Structures H80-016
Wave Focusing and Hydraulic Jump Formation H80-015
Jet Thickness in High-Speed Two-Dimensional Planing H80-014
Inviscid Parallel Flow Stability with Mean Profile Distortion H80-013
Predicting the Effects of Surface Roughness on Laminar-Turbulent Transition for Axisymmetric Bodies H80-012
Impact of a Rigid Plate on a Half-Strip of Incompressible Liquid H80-009
Collapse of Turbulent Wakes in Stably Stratified Media H80-005
Multiple Body Six Degrees of Freedom Potential Flow Pressure Equation H80-004
Low-Velocity Water Tunnel for Biological Research H80-001

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Potential Hydroelastic Instability of Profiled Underwater Structures H80-016
Jet Thickness in High-Speed Two-Dimensional Planing H80-014
Collapse of Turbulent Wakes in Stably Stratified Media H80-005

Nonsteady Aerodynamics

Potential Hydroelastic Instability of Profiled Underwater Structures H80-016

Wave Motion and Sloshing

Inviscid Parallel Flow Stability with Mean Profile Distortion H80-013

Interdisciplinary Topics

Research Facilities and Instrumentation

Low-Velocity Water Tunnel for Biological Research H80-001

Marine Technology

Hydrodynamics, Vessel and Control Surface

Wedge Effect on Planing Hulls H80-020
Hydrofoil Craft Drag Polar H80-018
Jet Thickness in High-Speed Two-Dimensional Planing H80-014
Foilborne Hydrodynamic Performance of Jetfoil H80-008
Re-Evaluation of the Planing Hull Form H80-006
Multiple Body Six Degrees of Freedom Potential Flow Pressure Equation H80-004
Comparative Performance Study of Paddle- and Wedge-Type Wave Generators H80-002

Mooring Systems and Cable Mechanics

Steady-State Configuration of an Underwater Suspended Bipod Cable System H80-011
Response of an Inflatable Offshore Platform to Surface Wave Excitations H80-003

Oceanography, Physical and Biological

Low-Velocity Water Tunnel for Biological Research H80-001

Propulsion

Re-Evaluation of the Planing Hull Form H80-006

Sea Pollution and Containment Control

Spread of Oil Slicks on a Natural Body of Water H80-021

Vessel Design (including Loads)

Wedge Effect on Planing Hulls H80-020
Hydrofoil Craft Drag Polar H80-018
Historical Review of WIG Vehicles H80-010
Re-Evaluation of the Planing Hull Form H80-006

Vessel Systems, Submerged and Surface

Foilborne Hydrodynamic Performance of Jetfoil H80-008
Flow Control of Centrifugal Jet-Flap Blowers for Air-Cushion Vehicles H80-007

Structural Mechanics and Materials

Structural Dynamics

Response of an Inflatable Offshore Platform to Surface Wave Excitations H80-003

Structural Stability

Steady-State Configuration of an Underwater Suspended Bipod Cable System H80-011
Response of an Inflatable Offshore Platform to Surface Wave Excitations H80-003

Structural Statics

Steady-State Configuration of an Underwater Suspended Bipod Cable System H80-011

Chronological Index

H80-001 Low-Velocity Water Tunnel for Biological Research. A. C. Charters and S. Miles Anderson, *University of California* (JH **14**, 1, p. 3) Synoptic

H80-002 Comparative Performance Study of Paddle- and Wedge-Type Wave Generators. M. H. Patel and P. A. Ionnaou, *University College London* (JH **14**, 1, p. 5) Article

H80-003 Response of an Inflatable Offshore Platform to Surface Wave Excitations. V. J. Modi, *The University of British Columbia*; and A. K. Misra, *McGill University* (JH **14**, 1, p. 10) Article based on AIAA Paper 79-0833 CP794

H80-004 Multiple Body Six Degrees of Freedom Potential Flow Pressure Equation. O. Burgdorf Jr., *Westinghouse Electric Corporation* (JH **14**, 1, p. 19) Article

H80-005 Collapse of Turbulent Wakes in Stably Stratified Media. Samuel Hassid, *The Pennsylvania State University* (JH **14**, 1, p. 25) Article

H80-006 Re-Evaluation of the Planing Hull Form. Daniel Savitsky, *Stevens Institute of Technology*; and Jerry L. Gore, *David W. Taylor Naval Ship Research and Development Center* (JH **14**, 2, p. 34) Survey Paper based on AIAA Paper 79-2028 CP7912

H80-007 Flow Control of Centrifugal Jet-Flap Blowers for Air-Cushion Vehicles. Fabio R. Goldschmied, *Westinghouse Electric Corporation* (JH **14**, 2, p. 48) Article based on AIAA Paper 79-2006 CP7912

H80-008 Foilborne Hydrodynamic Performance of Jetfoil. A. E. Noreen, P. R. Gill and W. M. Feifel, *Boeing Marine Systems* (JH **14**, 2, p. 56) Article based on AIAA Paper 79-2004 CP7912

H80-009 Impact of a Rigid Plate on a Half-Strip of Incompressible Liquid. D. S. Tselnik, *Stevens Institute of Technology* (JH **14**, 2, p. 63) Engineering Note

H80-010 Historical Review of WIG Vehicles. Richard G. Ollila, *Battelle's Columbus Laboratories* (JH **14**, 3, p. 65) Survey Paper based on AIAA Paper 79-2033 CP7912

H80-011 Steady-State Configuration of an Underwater Suspended Bipod Cable System. J. J. Mariano, *Bell Telephone Laboratories* (JH **14**, 3, p. 77) Article

H80-012 Predicting the Effects of Surface Roughness on Laminar-Turbulent Transition for Axisymmetric Bodies. M. J. Casarella, *Catholic University*; and J. M. Niedzwecki, *Texas A&M University* (JH **14**, 3, p. 83) Article

H80-013 Inviscid Parallel Flow Stability with Mean Profile Distortion. Wilson C. Chin, *Massachusetts Institute of Technology* (JH **14**, 3, p. 91) Engineering Note

H80-014 Jet Thickness in High-Speed Two-Dimensional Planing. Peter P. Payne, *Payne, Inc.* (JH **14**, 3, p. 93) Engineering Note

H80-015 Wave Focusing and Hydraulic Jump Formation. Wilson C. Chin, *Massachusetts Institute of Technology* (JH **14**, 3, p. 94) Engineering Note

H80-016 Potential Hydroelastic Instability of Profiled Underwater Structures. L. E. Ericsson and J. P. Reding, *Lockheed Missiles & Space Company, Incorporated* (JH **14**, 4, p. 97) Article based on AIAA Paper 79-2002

H80-017 Hydrodynamic Coefficients of an Oscillating Ellipsoid Moving in the Free Surface. R. B. Inglis and W. G. Price, *University College* (JH **14**, 4, p. 105) Article

H80-018 Hydrofoil Craft Drag Polar. H. Raymond Wright Jr., *Grumman Aerospace Corporation*; and Frank W. Otto, *Edo Corporation* (JH **14**, 4, p. 111) Article

H80-019 Boundary-Layer Transition on a Body of Revolution. G. C. Lauchle, J. J. Eisenhuth and G. B. Gurney, *The Pennsylvania State University* (JH **14**, 4, p. 117) Article

H80-020 Wedge Effect on Planing Hulls. Chun-Tsung Wang, *National Taiwan University* (JH **14**, 4, p. 122) Engineering Note

H80-021 Spread of Oil Slicks on a Natural Body of Water. T. R. Sundaram, *T. S. Associates, Incorporated* (JH **14**, 4, p. 124) Engineering Note
